DETAILED ACTION

Drawings

All Figures are improperly crosshatched. All of the cross hatching patterns should be selected from those shown on page 600-81 of the MPEP based on the material of the part. Also see 35 CFR 184 (h)(3) and MPEP 608.02.

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Also, the drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign mentioned in the description: die 60 (p.5, line15). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Additionally, the drawings are objected to because Figures 5 and 7 aren't clear; it is difficult to see the details. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application.

Specification

The disclosure is objected to because of the following informalities: See page 7, lines 13+ wherein applicant describes "invisible lines". A more appropriate description of the lines is necessary.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter that the applicant regards as his invention.

Claims 1-10 and 16-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites, "covering a portion the first surface". It is unclear as to this means. For this action examiner assumes it to mean that the bus member covers a portion of the first surface.

Claim 10 recites, "Wherein gate is a trench gate". For this action the examiner assumes the claim refers to the gate of claim 1 and no further gates being introduced.

Claim 16 recites a bus member electrically coupling the source region to the ground plane. What source region?

Allowable Subject Matter

Claims 11-15 and 18-19 are allowed. The claims recite a semiconductor die package comprising a semiconductor die comprising a vertical power transistor and the specific structural locations of the gate, drain, source and ground regions with respect to one another and with respect to a bus bar. The above specific limitations in combination with all other features recited in the claims make the claims allowable over the prior art.
